

The purpose of this site is to provide an update/correction for the above book. I regret that there are indeed several incorrectly typed equations in the book. They will be posted as I discover them. In the mean time, if you notice any error or misleading statements, I would be grateful to hear from you.

1. On page 24, Eq. (3.16) should read:

$$E_\nu = \left(\frac{\hbar^2}{2m} \right) \left(\frac{\pi}{L} \right)^2 (n_1^2 + n_2^2 + \dots + n_N^2)$$
